DETAILED ACTION

Response to Amendment

The Claims and Title, amended for clarity, are accepted by the examiner.

Allowable Subject Matter

Claims 1-10 are allowed. The following is a statement of reasons for the indication of allowable subject matter: the prior art made of record teach a millimeter wave band radio communication method in which a receiver receives both an RF band modulated signal and an un-modulated carrier transmitted from a transmitter but does not also teach disposing a plurality of receiving circuits, each formed as a single constituent element by combining a small receiving antenna and a planar receiving circuit at irregular intervals smaller than a wavelength corresponding to an IF band or at the same interval comprising phase adjustment and amplitude weighting for the detection outputs from the individual receiving circuits and mixing the detection outputs obtained through detection at the individual receiving circuits to output an IF band composite output for demodulation.

Conclusion

Reference the attached PTO-892 form with additional prior art made of record and not relied upon but considered pertinent to applicant's disclosure.
